PROFESSIONAL SUMMARY

Full Stack Django Developer with 2+ years of experience at a software house, delivering 6 client projects from requirements to production, now used by 2,000+ businesses. Leads a team of 6 developers alongside hands-on development: planning and assigning tasks, unblocking teammates, and keeping delivery on schedule. Manages production servers on Linux and Nginx, including deployments and the backup process that keeps client data safe.

EXPERIENCE

Software House Solutions *Cairo, Egypt*

Mid-Level Full Stack Django Developer *Feb 2026 – Present*

- Lead a team of 6 developers: break down requirements into tasks, assign work and track delivery.
- Act as the team's go-to person for technical problems, debugging blockers and guiding teammates to solutions.
- Develop core features of client projects with Django while coordinating the team's work.
- Manage production servers on Linux and Nginx: deployments, configuration and maintenance.
- Own the server backup process to protect client data and allow fast recovery.

Full Stack Django Developer *Aug 2024 – Jan 2026*

- Delivered client web applications end to end using Python, Django and Django Templates; together the projects serve 2,000+ businesses.
- Designed database models and business logic, taking features from requirements to production.
- Fixed production issues and improved existing systems after launch.
- Took on deployment and server responsibilities on Linux and Nginx.

CodeAlpha *Remote*

Machine Learning Intern *Feb 2024 – Mar 2024*

- Built a credit scoring model to support loan approval decisions (98% accuracy).
- Developed a handwritten character recognition system using a CNN.
- Built a stroke risk prediction model on patient health data.

TECHNICAL SKILLS
